**I. Introduction**

On March 27, 2014, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes to two analytical methods for use in periodic reporting.<sup>1</sup> The Petition identifies the proposed analytical method changes filed in this docket as Proposals One through Two.

**II. Proposals**

*A. Proposal One: Proposed Change in RPW Methodology for Use of Additional PostalOne! and Self Service Kiosk Data to Replace ODIS-RPW Statistical Sampling Estimates*

---

<sup>1</sup> Petition of the United States Postal Service for the Initiation of a Proceeding to Consider Proposed Changes in Analytical Principles (Proposals One Through Two), March 27, 2014 (Petition).

The Postal Service currently utilizes statistical sampling estimates from the Origin Destination Information System-Revenue, Pieces, and Weight (ODIS-RPW) to measure national revenue, pieces, and weight for Business Reply Mail (BRM), International Business Reply Service (IBRS) and Merchandise Return Service (MRS) mail. The Postal Service proposes to replace ODIS-RPW estimates with data from its PostalOne! system (PostalOne data) and Self-Service Kiosk data (SSK data) for its Revenue, Pieces, and Weight (RPW) Report. *Id.* at 2. Because PostalOne and SSK data reflect “census” information, that is, information collected from previous BRM, IBRS, and MRS mailings, the Postal Service asserts that these data do not contain the sampling errors that are inherent in statistical sampling systems such as ODIS-RPW. *Id.* at 2, 6. The Postal Service suggests performing ratio adjustments to account for those offices that do not use the PostalOne system for processing BRM, IBRS, and MRS pieces. *Id.* at 6-7.

*B. Proposal Two: TRACS Change to Fed Ex Night Turn Distribution Key*

The Postal Service employs a distribution key to assign volume variable costs for the Fed Ex Night Turn air carrier in the Transportation Cost System (TRACS). The distribution key is currently based on an ongoing statistical sampling of mail conveyed through the Fed Ex Night Turn air carrier system. *Id.* at 11. The Postal Service proposes to replace the statistical sampling data with operations data obtained from the Surface Air Management System (SAMS), the

Product Tracking System (PTS), the Foreign Postal Settlement (FPS) system, and data regularly collected by TRACS. It maintains that portions of the Postal Service census data are now sufficiently reliable to be the basis of the distribution key. *Id.*
